DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19 and 24-26, drawn to an electrowetting fluid meniscus.

Group II, claim(s) 20-23, drawn to an imaging apparatus.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I does not rely on or recite the claimed details of Group II, and Group II does not recite the claimed details of Group I. Group I is directed to an electrowetting fluid meniscus with a fluid chamber, two different fluids, specific electrode configurations, and a voltage control system. Group II is directed to an imaging apparatus having an image sensor for the recording of an image scene, wherein a non-specific variable fluid meniscus is included, which is controlled into two different configurations for directing regions of the image scene, and further does not include the details of Group I.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
